

Ukrainian State University of Railway Transport

1930

Ukrainian State University of Railway Transport is a state higher education institution with nearly a century of experience in training highly qualified professionals for the transport, energy, construction, IT, and economic sectors.

Founded in 1930, the University has developed a strong engineering and research school, earned a solid reputation as a reliable educational partner, and today is one of Ukraine's leading technical universities. The institution is located in Kharkiv, a major national center of science and education, which provides a favorable academic environment and broad opportunities for students' professional development.

The University educates more than **5,000 students**, including international citizens, which confirms the international recognition of the quality of education. The educational process is delivered by more than **250 academic staff**, including Doctors and Candidates of Sciences, professors, and researchers with practical industry experience. The University's faculties, educational and research centers, and departments implement modern study programmes at the Bachelor's, Master's, and PhD levels. All programmes are accredited in accordance with national legislation and comply with the standards of the European Higher Education Area, ensuring international recognition of diplomas and graduates' competitiveness in the global labor market.

The University's organizational structure includes five faculties covering key areas of modern engineering and management education:

FACULTY OF "CONSTRUCTION"

FACULTY OF "INFORMATION AND CONTROL SYSTEMS AND TECHNOLOGIES"

FACULTY OF "MECHANICAL AND ENERGY"

FACULTY OF "TRANSPORTATION PROCESS MANAGEMENT"

FACULTY OF "ECONOMICS"

EDUCATIONAL AND RESEARCH CENTER FOR HUMANITARIAN EDUCATION

Study programmes span a wide range of fields, including transport technologies, energy, automation and information systems, construction and infrastructure, logistics, management, economics, and digital solutions. The educational process combines a strong theoretical foundation with a practical orientation: students work in modern laboratories and computer centers, conduct applied research, and participate in projects, including international ones, the results of which are implemented at leading transport and industrial enterprises. This approach ensures the development of professional competences demanded by employers and supports graduates' rapid integration into the professional environment.

The University's international activities are aimed at integration into the global educational and research space. Cooperation agreements with universities in Europe, the United States, and Asia, as well as participation in international academic mobility programmes and research projects, create additional opportunities for internships, exchanges, and students' professional development. The University administration, the International Cooperation and Education Office, and the Academic Affairs Office provide systematic support for international students at all stages of study.

Bachelor's Degree

Admission based on a Certificate of Complete General Secondary Education

FACULTY OF "TRANSPORTATION PROCESS MANAGEMENT"

J4 Occupational Safety

- Security and Occupational Safety in Railway Transport

Full-time (3y 10m)
Part-time (3y 10m)

J7 Railway Transport

- Organization of Transportation and Transport Management
- Customs Control on Transport (railway transport)
- Organization of International Transportation
- Transport Service and Logistics

Part-time (3y 10m)

G11 Mechanical Engineering (G11.03 Technological Machines and Equipment)

- Lifting and Transport, Construction, Track and Mining Machines

Full-time (3y 10m)
Part-time (3y 10m)

G18 Geodesy and Land Management

- Geodesy, Land Management and Cadastre

Full-time (3y 10m)
Part-time (3y 10m)

G19 Construction and Civil Engineering

- Construction and Civil Engineering

Full-time (3y 10m)
Part-time (3y 10m)

J7 Railway Transport

- Railway Structures and Track Facilities

Full-time (3y 10m)
Part-time (3y 10m)

FACULTY OF "INFORMATION AND CONTROL SYSTEMS AND TECHNOLOGIES"

F7 Computer Engineering

- Specialized Computer Systems

Full-time (3y 10m)
Part-time (3y 10m)

F6 Information Systems and Technologies

- Artificial Intelligence Technologies

Full-time (3y 10m)
Part-time (3y 10m)

G5 Electronics, Electronic Communications, Instrumentation and Radio Engineering

- Electronic Communications

Full-time (3y 10m)
Part-time (3y 10m)

G7 Automation, Computer-Integrated Technologies and Robotics

- Automation, Computer-Integrated Technologies and Robotics
- Computer-Integrated Systems and Technologies

Full-time (3y 10m)
Part-time (3y 10m)

J7 Railway Transport

- Organisation of Control of Train Traffic Management Systems

Full-time (3y 10m)
Part-time (3y 10m)

FACULTY OF "ECONOMICS"

C1 Economics and International Economic Relations (C1.01 Economics)

Full-time (3y 10m)

FACULTY OF "MECHANICAL AND ENERGY"

G3 Electrical Engineering

- Power Supply and Resource-Saving Technologies
- Electric Transport

Full-time (3y 10m)
Part-time (3y 10m)

G4 Energy Production (G4.02 Thermal Power Engineering)

- Thermal Power Engineering
- Sustainable Energy Systems and Consulting

Full-time (3y 10m)
Part-time (3y 10m)

G6 Information-Measuring Technique

- Metrology and Information-Measuring Technique

Full-time (3y 10m)
Part-time (3y 10m)

J7 Railway Transport

- Locomotives and Locomotive Facilities
- Cars and transport engineering
- Electric locomotives and electric trains

Full-time (3y 10m)
Part-time (3y 10m)

EDUCATIONAL AND RESEARCH CENTER FOR HUMANITARIAN EDUCATION

B11 Philology (B11.041 Germanic Languages and Literatures (including translation), first – English)
